DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Lampi et al (US 4870592).

Claims 1,3-6: a robot system comprising a robot and an apparatus driven by a servomotor, the robot system comprising a detecting unit (fig. 14:440) detecting an operator's approach to the apparatus including an apparatus which carries out operation in cooperation with the operator's entry to an area (col. 16:9-17); a unit connecting and interrupting power to the motor (Fig. 1: 70,72; Col. 8:43-52); an emergency unit receiving a notice of an operator's approach to bring the robot system to a stopped state, wherein power supply to the robot and to each specified apparatus is interrupted (Fig. 35:1220,1214; col.14:1-10, col. 31:11-25,46-62; it is known in the art that "non-operational" means that something is not energized); and a unit for monitoring a state of the power supply to the motor and canceling the notice (Col. 16: 35-48; col. 31:33-37).

Claim 2: the apparatus includes a robot (Fig. 14: 388).

Art Unit: 2837

Response to Arguments

3. Applicant's arguments filed 09 June 2005 have been fully considered but they are not persuasive. In response to applicant's argument that Lampi et al do not teach a detection unit detecting an operators approach to stop the robot and deenergize the robot and each specified apparatus, Lampi teaches a detection unit (Fig. 14: 440) that detects and operators approach in order to stop the robot and the machines (col. 31:11-25,47-60). Lampi et al teach park routine and a non-operational routine. As known in the art, "parking" means to stop an energized apparatus and that "non-operational" means that something is not energized. During an error, if the robot or machines are stopped/non-operational (not started), then there is no power going to them. To get them started again a start subroutine must be implemented. There is nothing in applicant's claim language that precludes the examiner from reading Lampi et al from meeting the claimed limitations.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2837

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Renata McCloud whose telephone number is (571) 272-2069. The examiner can normally be reached on Mon.- Fri. from 8 am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Martin can be reached on (571) 272-2800 ext. 4. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
